Reablement. *Third step.*

- Concept we had
- Further research
- Concepts to take forwards
- Development of these concepts
- Next steps

Summmery after second presentation.

Concepts we had.

we had six concepts

- Gorilla Gardening
-House swapping
-Genaration mixer
-Reablement Buddy
-Audio recorder
-skills swap

After the last presentation we looked back at our concepts and dicided to cut a lot of them out, 1 because some of them could be rolled into one main concept and, 2 we were close to crossing over to other subjects, so we wanted to bring it back directly to reablement.

Benefits, Problems and solutions.

Benefits

More creativity leading to more ideas and better results

Increased satisfaction

The opportunity to develop and acquire new skills

The speed at which things can be achieved

A support network that you can draw on

Support e.g. more experienced members

can help, mentor and develop the less experienced members.

"Two heads are better than one"

Problems

Social Loafing,

Social Loafing is the phenomenon of people exerting less effort to achieve a goal when they work in a group than when they work alone.

This is seen as one of the main reasons groups are sometimes less productive than the combined performance of their members working as individuals
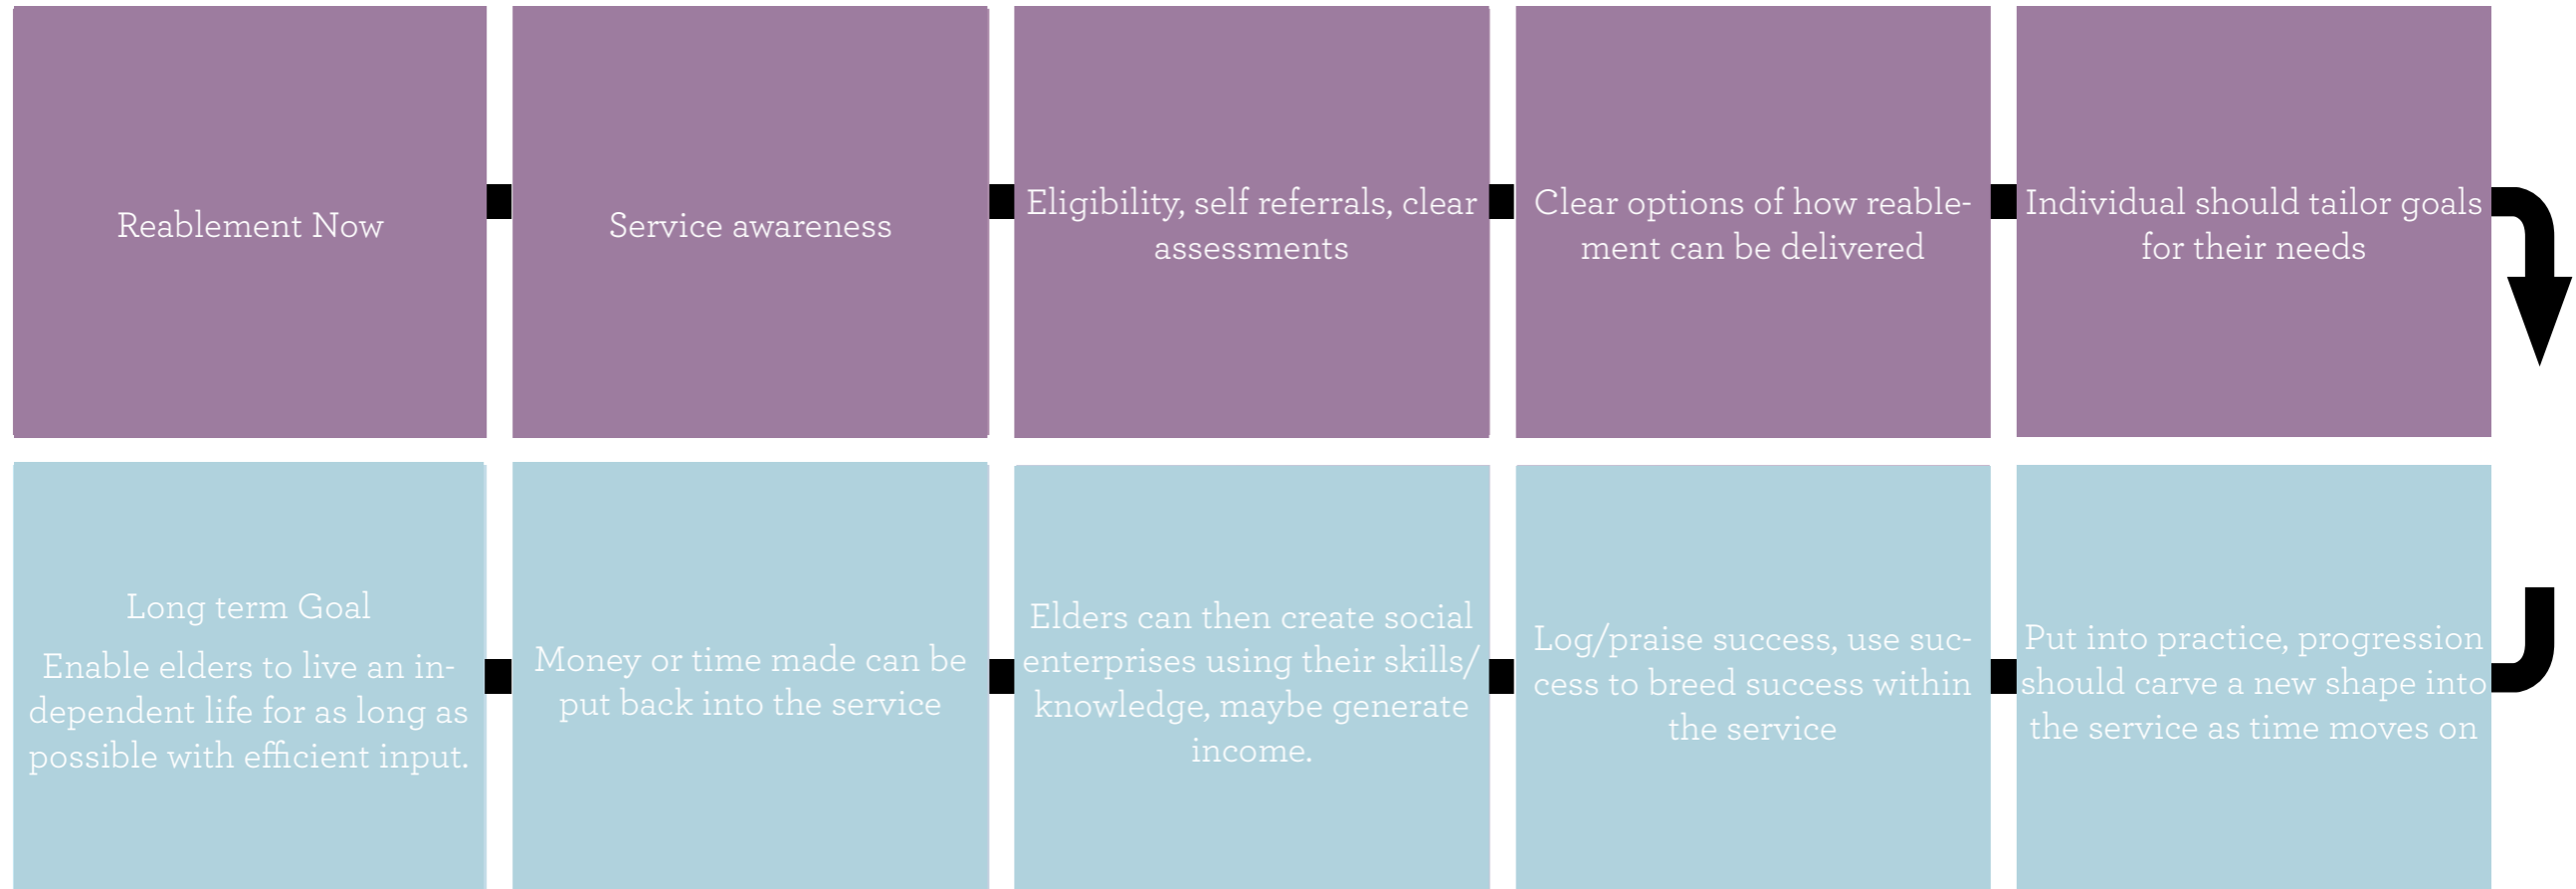

Solutions

Careful preparation of group assignments and group members. (Combat social loafing)
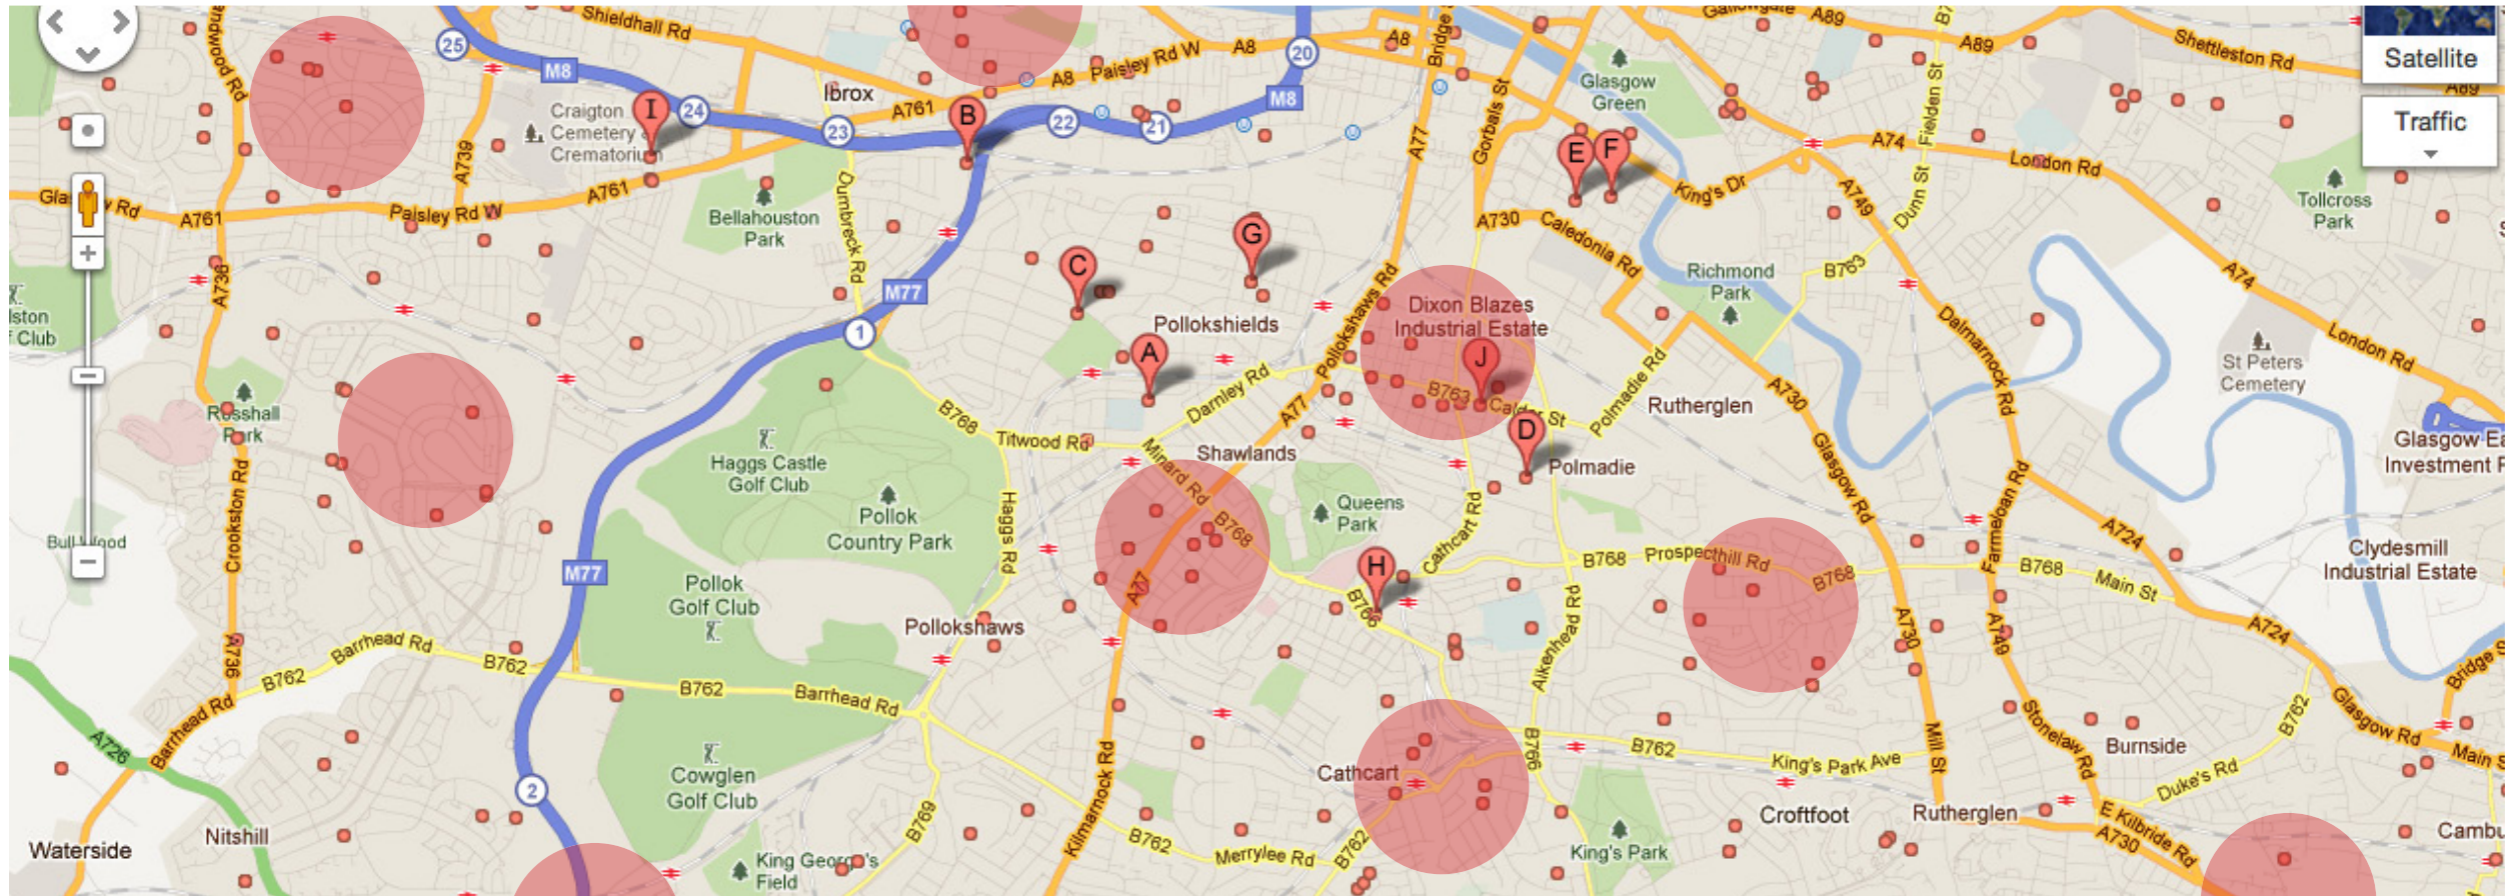

Setting S-M-A-R-T goals

Understanding goals, and the reason the team has been created.

The manager should allow the pair to function without hovering over it, but will be fully involved

7

Short term goals, stepping stones

Reablement Now	Service awareness	Eligibility, self referrals, clear assessments	Clear options of how reablement can be delivered	Individual should tailor goals for their needs
Long term Goal Enable elders to live an independent life for as long as possible with efficient input.	Money or time made can be put back into the service	Elders can then create social enterprises using their skills/knowledge, maybe generate income.	Log/praise success, use success to breed success within the service	Put into practice, progression should carve a new shape into the service as time moves on

Possible areas in southern Glasgow

These show a 1km radius of high concentrated areas of schools. We should investigate these areas further to find the older generations within these areas. Could be good places to set up Hubs/Buddy services.

These smaller circles indicate schools, or nurseries within the south of Glasgow.
